## **Climate Seal™ Storm Windows Thunders into Charlotte Bringing Longevity, Quality Products**

Charlotte, NC - November 4, 2009 – In a major company move, Climate Seal, the maker of custom storm window systems for nearly 30 years, has relocated its national distributorship through Environmental Window Solutions, LLC to Charlotte, embarking on a new chapter in the company's history and looking to work with clients both near and far.

Climate Seal, a hallmark company in effective and versatile storm window systems, specializes in creating customized products that are also environmentally friendly. Its products have recently become available to the residential and commercial public, who can now enjoy the reputation and cost efficiency previously unattainable. This is an exciting opportunity for homeowners, contractors, architects and interior designers who would like to provide the best in storm windows for renovation projects.

Known for its unique ability to address thermal, acoustic and preservation window needs within the residential, commercial and historical communities, Climate Seal will customize its products for any project. In fact, the Climate Seal storm window system has been installed in some of America's most historic landmarks, museums and National Park Service projects.

###

*Environmental Window Solutions, LLC, is the master distributor for the Climate Seal brand and has installed thousands of windows since 1981. It services a national dealer network and homes of every shape and size from apartments to America's castles.*

*Climate Seal is manufactured by Acoustical Surfaces, Inc. in Chaska, MN and is proud to be "Made in the USA."*
